Address by Allan Sullivan,  
Mgr. of the Anglo-Canad-  
ian Gold Estates Ltd.

DELIVERED IN LONDON, ENGLAND

PLANS AND OPERATIONS OF THE COMPANY THE SPLENDID RESULTS OBTAINED.

Alan Sullivan, manager of the Anglo-Canadian Gold Estates, Limited, returned to Toronto this week from his trip to London, and will most probably be in Rat Portage in a few days. At a meeting of the shareholders of the company, he delivered an excellent address, which was published in several of the leading financial papers of the metropolis, and which we take from the London Financial News dated the 8th inst.

An informal meeting of the shareholders of the Anglo-Canadian Gold Estates, Limited, was held on Monday at Winchester House, Old Broad St., E. C., under the presidency of S. W. Paddon, to receive a report from Alan Sullivan, C.E., M.E., the company's manager in Toronto, on the position and prospects of the undertaking.

The chairman said: "All morning, as you know, we've been talking about you, and we've been talking about something like you. And, in fact, I believe it's something like you. Hear, hear." I would not have had a word to say, and I had had the opportunity of talking to Mr. Sullivan. I think, therefore, I may congratulate you and our society on being shareholders in this little company. Our manager has known for several years the direction in which we are carrying on our action, and being on the spot from the start.

he has been able to acquire for us something for nothing.

Alan Sullivan, who was received with applause, said: In regard to the Lake of the Woods, the region is traversed along the northern edge by the main line of the Canadian Pacific Railroad, and there is at present under construction another independent line called the Ontario and Rainy River Railroad, which practically bisects it from end to end. I might say that this new railway penetrates a great deal of the most valuable land controlled by the Anglo-Canadian. The district has an unparallelled water-way, consisting of a maze of lakes and navigable rivers stretching for hundreds of miles. The ground, where bare rock exposures do not occur, is covered with a dense growth of pine and spruce, and other merchantable timber. The most attractive feature

of the district is, of course, its auriferous belt. This I find somewhat hard to describe, because this whole enormous tract may be said to compose the auriferous belt. Wherever you go, in any part for it, there are outcropping reefs, varying from 1 ft. to 400 ft., and my personal estimate is that 50 per cent. of these reefs carry gold in appreciable quantities. This high percentage is no exaggeration, and I venture to say it is unparalleled in any other part of the globe. There has been a great deal of volcanic disturbance throughout the district, for which fact I attribute its auriferous qualities. All along and near the edge of the contacts bounding the eruptive points gold is found, sometimes in reefs of outcropping quartz, some dykes or bands of schistose rocks through which the solutions carry 2 gold values may be obtained with extraordinary uniformity. I do not consider that the future development will be so much in the direction of the large reefs, which vary in size from 2 feet to 6 feet, and in value from 10 wts. to 10 dwts., as in the washing of gold ore. These large dykes will give a good profit, and must prove to have been intended on nature's part. I myself have seen these dykes 400 ft. wide, with an average thickness of 75 ft., under conditions such that the water power is sufficient to move one shoulder rock a day. I am sure that if all the water were turned out of the mine, it would

what promises to be a most valuable ore body. (Applause.) In our drive at 60 feet, which was put in to prove the amount of local disturbance and dip of the ore shoot, the values are about 30 dwts. The shaft is being sunk on the edge of this shoot, and at the bottom of it we have rather over 4½ feet of ore, which is worth 19 dwts. per ton—a highly satisfactory result when it is remembered the total cost of production is only 5 dwts. At 60 feet the shaft left the hanging wall of the reef, which latter is now about 12 feet from the shaft. In sampling for an assay—and these assays are invariably averages when I come to the surface I wash the stone carefully, and throw out of it any which contains visible gold, or anything which resembles gold. The remainder is then crushed into cubes which will pass through a 35 in. ring, and again examined for gold; if any is found the discarding process is repeated. The balance is assayed, and these are the results—which have been submitted to you. This is a very severe test. My object in all this is to insure that the value attached to your stone shall not exceed its actual commercial worth, and that our crushings will not fall short of our assay returns. Consequently, when figures are sent you, shareholders may feel perfectly satisfied that a minimum valuation has been placed upon the property. At 100 ft. in the Reliance we are now entering upon what I take to be a large and valuable body of ore, and I have every reason to believe, as has also my assistant, Mr. Paterson, that the mine will not in any way belie its name. (Hear, hear.) It is my intention to erect, say, ten head of stamps on the mine as soon as possible, and I hope to be able to report to you at no distant date that the Reliance is not only a crushing mine, but a mine yielding results which will enable the directors to give you a very satisfactory, even a handsome return upon the capital invested. (Applause.) We must not forget that the Reliance is a discovery made on one of our smallest areas. We are left an enormous area, and you must take it from me that we will be exceedingly in finding more of it, which can either be worked on the surface, or shafted off as a drift. (Applause.)

Third Annual Session of the  
International Mining  
Congress

WILL BE HELD IN MILWAUKEE, WIS.

ON JUNE 18TH TO THE 23RD, 1966, THE  
AND EXTENSIVE MINERAL  
EXHIBITS COLLECTION.

The third annual annual session of the International Mining Congress will be held in Milwaukee from Jan. 10th to 25th. It will be a representative gathering of the leading technicians of the continent, and a representative men of Western mining are asked to take part in its deliberations. We believe they should make an effort to attend. The benefits to those who are able to attend or avail themselves of its results, will be innumerable.

In the circular sent out by the secretary it is stated, "It is not the object of this congress to confine its consideration alone to that of mining for gold and silver and their by products, but that of iron, coal, marble, stone, the various fire clays, asphaltum and a kindred interests of the mineral and metallic classes."

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as  $t \rightarrow \infty$ . It is shown that the solutions of the system (1) tend to zero as  $t \rightarrow \infty$  if and only if the matrix  $A$  is stable.

To cultivate acquaintance, fraternal feeling and hearty cooperation among the various mining, manufacturing, transportation, commercial and labor bodies represented.

"To exchange practical ideas covering the various phases of the mining business; an interest embracing every branch of the mining industry, which affects more than one-third of the people of the United States, producing \$1,800,000,000 annually in value of products."

dykes, as in the winning of gold from these large dykes, where the marginal profit, while not so great, may be counted on as absolutely certain. I myself have seen these dykes 300 feet wide, with an average value of 6 dwts. where, under conditions due to available water power, the cost of treatment should not exceed 3 dwts. In an ore body of this nature a very small amount of development work is necessary to prove the existence of a very large body of payable stone. I do not expect them to increase in value with depth, as has been often stated, for this very important reason, that as the result of the wearing down by glacial action, the present surface of the country is from 900 to 800 feet at least below the original surface. This means, in other words, that nature has done this amount of prospecting for us, and at 500 feet below the present surface I have seen reefs which amply justify my assertion that they do most certainly carry down to an indefinite depth. The depth of surface disturbance does not, as a rule, extend beyond 100 feet. A point to which I particularly wish to draw your attention is the purity of our ores. They do not contain tale, which causes slimes and loss of value, or arsenic, which sickens men and prevents amalgamation; neither do they contain an appreciable amount of copper, which prevents economical extraction by cyanide.

Our labor conditions are most favorable. There is an abundant supply of skilled labor at a cost of \$1.75 to \$2 per day. The erection of a plant of machinery is also most reasonable, owing to our transportation facilities. The cost is, roughly, about \$150 per stamper; in the Rand I believe the rate is \$100 or thereabouts. Our percentage of extraction is high, owing to the simple nature of the ores. In most of them from 60 to 80 per cent. can be extracted by amalgamation, the remaining 20 per cent. by cyanide; that is to say, in ordinary cases, we have a total extraction of from 85 to 90 per cent. is easily obtained with a modern and economical plant, and cyaniding is practically rendered unnecessary. You are aware of the areas you already hold, and an additional area has been obtained of about 75 square miles. Your vast property is represented by blocks in all parts of the district, most of which are easily accessible, and all of which are, to my personal knowledge, more or less auriferous. To give you an idea of the rapidity with which work can be done, within 10 days last year from the time I received instructions to begin operations men were on the ground and operations had been begun, and a most valuable discovery had been made. The discovery I refer to is the Reliance. With regard to the work already accomplished, I may say the Reliance shaft is now 100 feet deep, and we have proved the existence of

some return upon the capital invested. (Applause.) We must not forget that the Reliance is a discovery made in one of our smallest areas. We have still left an enormous area, and you can take it from me that we shall have no difficulty in finding more Reliances which can either be worked by the Syndicate itself or floated off as subsidiary companies. (Applause.) There are places underground on the Reliance where I cannot get lower values than I cost over a width of about 2 ft. On the surface, in making check assays over a width of 5 ft. Mr. Paterson told me he got about 6 ozs., and from other samples, the results were 12 ozs. Our total expenditure to date is about \$5,000. Our camps are all erected and are most comfortable; the machinery paid for, a stock of timber and lumber has been saved for the coming summer with an extemporised mill constructed out of log steam launch, and supplies have been laid in for the next two months. Your employees are all competent, reliable and enthusiastic, and I cannot see that anything has been left undone which would leave in any way contributed to the ultimate issue.

I was informed a month ago that it was proposed to issue 10,000 additional shares. I am glad of that, because it gives me, Mr. Paterson, our assistant manager, and other friends who know through living on the spot, the great possibilities of this country, an opportunity of showing our confidence in the country by taking a substantial block of these unissued shares. I have not come over to England to preach, but to practice, and I am sure that the most exacting shareholder could not wish for more convincing proof of the belief in the Anglo-Canadian Gold Estates than by our putting up hard sovereigns with yours. We are rich men, and I can assure you that we cannot afford to lose any money. You may therefore rely upon it that we have not taken shares in this company, as less we were not that we should get our share of the return. (Applause.) All this is done, and I am sure that you will be able to see the economic, persevering, and hard working of the Anglo-Canadian Gold Estates. I shall be back in the fall, and I am sure that you will have pleasant recollections of my visit. I am most assured that nothing will be wanting on the other side, for we are well equipped, and it will be very well supported and confidence given to you down your investment in this company as amongst your best. (Applause.)

The Shamrock took a large party of excursionists to Regina mine and Whitelash rapids on the 21th, where a stop was made for fishing. The boys who went report a good catch and an enjoyable time.

and labor bodies represented. To exchange practical ideas covering the various phases of the mining business, an interest embracing every branch of the mining industry, which affects more than one-third of the population of the United States, produced eight hundred millions of dollars. Proposals are invited of all kinds and papers on mines, mining, including machinery and kindred topics to be embraced in the programme now being prepared, and on adjournment of the congress to be published with its proceedings in book form.

A large delegation of well-informed, thinking mining men will take part in the discussion and we believe it would be of lasting good if a number of the leading mining men of this district could sub up against a number of the representative mining men of our neighbor to the south. Special railway and hotel rates are promised, and all are assured of ample accommodation.

Any information desired may be obtained from T. J. Sullivan, secretary local committee, Suite 115 Springfield Bldg., Milwaukee, Wis.

## SIN OF "NOT-DOING."

The Rev. Mr. Rochester  
Talked on the Above  
Theme

### TO KNOX CHURCH CONGREGATION

ON SUNDAY NIGHT LAST—SYNOPSIS  
OF THE INTERESTING  
SERMON.

Therefore to him the knowledge to do good, and doeth it not to him it is sin. It has been said that he who makes two blades of grass grow where but one grew before is a public benefactor. This is doing good on the level of the earth, and in relation to man's physical well-being. How much, therefore, are they to be extolled whose work is for man's moral and spiritual welfare, his eternal well-being, and whose generous influence among men is thus described by the prophet: "The wilderness and the solitary place shall be glad for them; and the desert shall rejoice, and blossom as the rose; it shall blossom abundantly, and rejoice even with joy and singing." The converse of this statement is given us in the passage we are now considering. The man who accomplishes no good is a sinner. It matters not how blameless he is when judged by certain commandments that forbid. His condemnation lies in this, that he withholds good from them to whom it is due when it is in the power of his hand to do it. He sins by omission; and how great this sin is can be judged only when we think of the deprivation, physical and spiritual, temporal and eternal, to which negligence subjects our neighbor. We shall be true, then, to the thought of this message, if we say:—1. The important thing is to DO. Mere harmlessness, if this can be said of any one, does not make a saint or constitute manhood. When Paul spoke about being "harmless and harmless as the sons of God," he emphasized this also, that we should shine as lights in the world. Light is a most beneficent influence. There is a most harmful vice which is found abundantly in our neighborhood. We call it poison ivy. Contact with it means sore and protracted suffering to many. In other lands the dreadful Cus tree with its deadly distillations, is known as one of the dangers incidental to travel. As menaces to health and life we seek the blight and destruction of such plant life. Jesus, by the word of His mouth, caused a fig tree to wither. There are no beneficial exudations from its trunk, or leaves. Exuberantly clothed with foliage, it often affords the most grateful shelter, is a beautiful natural arbor. This tree was fruitful and good. This

lie nearest to mind. "Whatever thy hand findeth to do, do it with thy might." There is an old proverb worthy of remembrance, "Do the next thing." Duties, apparently trifling, are often neglected. The small is neglected for the great; the near for the far. The reputation of artists, both of the pen and the brush, has been gained by reproducing the commonplace. They treated and dignified the seeming trivial, and the world is astonished at their greatness. Their success seems to justify the exhortation in rhyme:

To thou sculptor, painter, poet!  
Take this to heart, thy heart!  
"That is best which is best nearest,"  
Form from this thy work of art.

The same thought is conveyed in the legend of the artist who despaired of realizing the vision of his life because he could not find a piece of sandal wood out of which to carve a Madonna. In a dream he was bidden to shape the figure from a block of oak destined for the fire. The production was a masterpiece. Life's opportunities are before us here and now. The surest way to find "our mission," as we speak, is to do what lies at hand. The discipline of daily self-preparation for the greater things to come. "We get to our mission," by the ladder-ropes of daily faithfulness. Jesus will come in God's good time to judge the world. Remember, we are responsible for our doing.

### A Card.

We, the undersigned, do hereby agree to refund the money on a 25c bottle of Dr. Williams' English Pills, if, after using three-fourths of contents of bottle, they do not relieve Constipation and Headache. We also warrant that four bottles will permanently cure the most obstinate case of Constipation. Satisfaction or no pay when Williams' English Pills are used. Johnson's Pharmacy, Rat Portage, Ont. J. E. Wood, Druggist, Rat Portage, Ont. J. Werner, Druggist, Rat Portage, Ont.

### Central Canada Chamber of Mines.

Monetary Times: Many Canadians have wondered why it is that capitalists in Great Britain and on the continent of Europe showed so little interest in the mineral development of western Canada. While many Americans have shown their confidence by investing largely in British Columbia and Ontario mines, and while many of our own citizens are putting their comparatively limited means at the disposal of those who are slowly developing our undoubtedly mineral riches, we have scarcely tapped the great reservoir of European capital. At most it is only here and there that evidences of interest in our mines on the part of English or continental investors can be shown. How comes it that when Australia, Africa, American mines and prospects have attracted hundreds of millions of European money, Canada has mostly been given the go-by in this respect? Perhaps it

"THE ACADEMIE DE MEDECINE OF FRANCE  
HAS PLACED

("THE QUEEN OF TABLE WATERS.")

At the Head of All the Waters  
Examined for Purity and Freedom  
from Disease Germs."

This body proposes to do for Canada something like what the Johannesburg Chamber did for South Africa. An interesting address, with comparative statistics, applied to the goldfields of the Lake of the Woods, Ontario, Lakes Manitoba and Winnipeg, Port Arthur, etc., upon this subject by Mr. F. H. Malcolm, late president of the Johannesburg Diamond Boring and Developing Company, has already been published by the institution, which can be obtained free upon application. We observe that the gentleman named, whose office is at Winnipeg, has been made secretary of the chamber. There are many influential names in the lengthy list of honorary patrons, but to these we do not attach so much importance as to the working members. These include F. W. Stobart, president; D. W. Bole and C. W. Chadwick, vice-presidents; D. C. Cameron, Senator Cox, of Toronto; Col. Ray, of Port Arthur; R. A. Mather, A. M. Nanton, H. C. Hammond, of Toronto; J. D. Crawford, Montreal; F. W. Heubach, K. J. Whittle, and a score or two of well-known business men of the west. We shall look with interest for results from this body, which from its constitution would seem to be a serious business.

### We Have the Confidence.

Of physicians and the public in the filling of prescriptions and dispensing of drugs. Our patrons are well and faithfully served when they visit our store. Our prices are always the lowest when purity, quality, and value are considered. Paine's Celery Compound is our best seller. It has won the confidence of the public by its wonderful and permanent cures. We recommend Paine's Celery Compound if you are a sufferer from nervous troubles, Bright's disease, liver complaint, neuralgia or dyspepsia. J. E. Wood, Druggist, Cor. Fort and Matheson Sts., Rat Portage, Ont.

### WHIM-WHAMS.

A Budget of Jokelets Gathered For Appreciative Readers.

Sir: Would you call Dewey a salt? He: Certainly, salt of the earth.

Bacon—Did you ever eat any mus-  
hel?  
Egbert—Oh, yes; I suppose I have in the leg of a chicken.

Teacher: Do you know what makes the rain, Willie?  
Willie: Yes; water.

Belle: Does Beatrice spend much time shopping?  
Henk: That's all she does spend.

The Butler: I should like to look at some safeties.  
The Storekeeper: Yes, sir; bicycles or razors?

Bill: Do you believe that riches have wings?  
Jill: Can't say, they never seem to fly my way.

Patience: What a lovely complexion

to many. To other lands the dreadful pass tree, with its deadly distillations, is known as one of the dangers incidental to travel. As menaces to health and life we seek the blight and destruction of such plant life. Jesus, by the word of His mouth, caused a fig-tree to wither. There are no baneful exudations from its trunk, nor leaves. Luxuriantly clothed with foliage, it often affords the most grateful shelter, is a beautiful natural abode. This was fruitless; and is thus, in its blight, a type of God's judgment upon those who do not seek the pleasure of lives and luxuries impresses the same thought. Of this, one writer says, "If human language can fix upon the memory by sentences more picturesque than these, the sinfulness of not doing good, who will devise the song or sermon, or the story more impressive than this parable of Jesus." There is an overwhelming wealth of reference to this subject in the Scriptures. Jesus spoke to us as well as to the Pharisees when He said to them, "Thou oughtest to have done and not to leave the other undone." Each of us is to be an influence, a force in life, an active agent of good. Jesus' biography is sufficiently given in these words: "He went about doing good."

2. Our knowledge and our ability determine our responsibility in "doing." James mentions knowledge. Ability is implied. "It is accepted according to that which hath, and not according to that he hath not." This apostolic assurance is applicable to both "giving" and "doing." "How much am I to do," some one asks. "We are to do what we know should be done. But the limit is further defined by the measure of our ability." "Silver and gold have I none," said Peter, "the man lying at the beautiful gate of the temple, what such as I can give I give unto thee." Common sense is to be our guide when we are "doing" duty. Allowing this qualification, we must admit a difference between the knowledge of needs, a complete lack of duty, and our ability. The fact do not keep pace with our eyes. Plain duties, works concerning the necessities of which conscience has been satisfied, are left undone. We have heard of the sick, but ministrations to their needs still lags. Strangers have come, and we know where they have, yet are they unvisited. The famine-stricken of India, the missionary, the laborer, the work among us, have all made their appeal. Yet their is no response. Sometimes we may plead ignorance. Not always, however. Even when we do so plead in truth, might it not be replied, "You ought to know." Ignorance, too, may be a sin. It is our duty to find out, to know. The book of Proverbs speaks very seriously on this matter: "If thou forbear to deliver them that are drawn unto death, and those that are ready to be slain; if thou sayest, behold, we knew it not; doth not He that pondereth the heart, consider it? He that keepeth thy soul, doth not He know it? And shall not He render to every man according to his works?" The agent of a missionary society, soliciting on behalf of the work, made his appeal to a rich man. He was gruffly met with the reply, "I don't think it's my duty to keep the whole world straight." The responses took this form, "It's your duty to keep straight as much of it as you can." Let us, then, bring every gift into Christ's service. Let us do our best. Hear the words of the Master as He spoke of ministering, "If ye know these things, happy are ye if ye do them."

3. One word of counsel might be added. Let us do those things which

great reserve of European capital. At most it is only here and there that evidences of interest in our mines on the part of English or continental investors can be shown. How comes it that when Australia, African, American mines and prospects have attracted hundreds of millions of European money, Canada has mostly been given the go-by in this respect? Perhaps it is for lack of definite information as to our resources, for there is abundance of capital in Europe, centres ready to flow into any channel whence a return can be shown.

Not 20 years have elapsed since the riches of the Transvaal in minerals and diamonds were demonstrated broadly to the satisfaction of Europeans. And a need less than half that period to influence the placing of twelve hundred millions of dollars of European capital and thousands of prospectors and miners within its borders for mining purposes. How was this effected? Largely by the organization of the Johannesburg Chamber of Mines, the function of which was to place before the world the mineral resources of South Africa. It began its work, we are told, by a systematic propaganda of scientific, general and statistical information. This was achieved by applying the newspaper press of England daily with short paragraphs of interesting information upon mining matters, never allowing the interest to fall, until the millions of continental Europe were throughout the world, fully aware of the fact that there was such a place as Johannesburg and a definite fact that gold was there in payable quantities.

Something of the kind is needed in Canada, and we are pleased to learn of the foundation of a Winnipeg Chamber of Mines.

**STRENGTHENS WEAK LUNGS.**

Many persons are in a condition to invite Pneumonia or Consumption by reason of inherited tendencies or other causes. They catch cold easily—it is difficult to get rid of an ordinary cough or cold. We would advise all such persons to use Dr. Wood's Norway Pine Syrup.

It is a wonderful strengthener and healer of the breathing organs, and fortifies the lungs against serious pulmonary diseases.

Miss Clara May Hall, Moore, Ont., writes: "I have suffered several years with weak lungs and could get no cure, so became discouraged. If I thought cold was hard to get rid of, I started using Dr. Wood's Norway Pine Syrup, and as a result my cough has been cured and my lungs greatly strengthened."

**Dr. Wood's Norway Pine Syrup.**

25c. and 50c. bottles. All druggists.

**WORKERS.**

**IT IS MAILED FREE TO ALL WHO SEND FOR IT**

The new illustrated "Diamond Dye Rug Book" you justly claim the largest circulation of any book ever issued in Canada. It tells how to make pretty and useful Hooked Mats and Rugs from old wool or cotton rags, underwear and pieces of cloth. This interesting little book shows handsomely colored designs of new Mats and Rugs and tells you how to send for them. Post free to any address. Wells & Richardson Co., 290 Mountain St., Montreal.

**Paternalistic Process.**

"I'm afraid I made a mistake when I told Willie that I never played truant when I was a boy," said Willie's father.

"Why?"

"Well, I can see very plainly that I have fallen a good deal in his estimation."

"Thinks you were a sort of milkson, does he?"

"I'm not quite sure whether he thinks that or just puts me down as a plain man."

**Something to Be Considered.**

Prospective Tourist (at booking office of great ocean line)—That stateroom is near the stern of the vessel, isn't it?

Agent—Yes, sir.

Prospective Tourist—You ought not to charge me full price for it.

Agent—Why not?

Prospective Tourist—Because when the steamer comes to land I'll have to walk half a mile to get ashore.—Chicago Tribune.

**How, Indeed!**

Chicago Girl—Suppose we go to the top of that 22 story building. You can get a splendid birdseye view of the city from there.

St. Louis Girl—Why, how can I? I haven't got any birdseye.—Chicago News.

**Thought It the Real Thing.**

"Mrs. Chiperton took care of my pain while I was away and ruined it."

"How?"

"It was one of those varnished pains, and she watered it every day."—Dallas News.

**Thoughts.**

"Lots o' men," said Uncle Eben, "who has great forethought an brilliant afterthoughts fails to get along, case dey ain't got no time left for de right now thoughts."—Washington Star.

**Time For a New One.**

"Harry, just two years ago today"—

"What? Is this our marriage anniversary?"

"No; two years ago today you bought my winter coat."

**It Would Have to Be Guarded.**

Ida—There is some controversy as to the kind of cornerstone for the girls college.

May—Why can't they use a brick of ice cream?

The caller—I should like to look at some safeties.

The Storekeeper—Yes, sir; bicycles or razors?

Bill—Do you believe that riches have wings?

Jill—Can't say; they never seem to fly my way.

Patience—What a lovely complexion and teeth she has!

Patrice—Yes; you know her father is very rich.

Yeast—What does that mackerel sky mean?

Crimsonbeak—Why, it means that today is Friday.

She—I understand a man has 577 muscels in his body.

He—Well, a pianist brings a good many of them into play.—Yonkers Statesman.

**It Never Fails To Make Sick People Well...**

**Paine's Celery Compound**

Is A Great Physician's Prescription.

it Possesses Life-Giving Virtues Unknown to Other Medicines.

All Classes of Our People Speak of Its Marvellous Cures.

The best blessing of life—good health—depends upon the perfect action of the nervous currents and the vigor of the circulation and the quality of the blood.

If you are run down, feel without energy, lifeless, useless, fretful and despondent, one or two bottles of Paine's Celery Compound will effect a wonderful change. Constipation will no longer give you disquieting thoughts; your appetite will come back; the blood will be made pure; sleeplessness, nervousness and headaches will be things of the past. This is the happy experience of tens of thousands of men and women in Canada.

The great and ever increasing demand for Paine's Celery Compound as a health builder tells the story of the continued confidence and faith placed in it by our people.

Paine's Celery Compound must not for an instant be classed with the ordinary patent of the day; it is an enduring physician's prescription that gives new life, vigor and strength when all other remedies fail. The use of one bottle is sufficient to convince the most hardened and skeptical.

price is based on every sale by the makers.

**Mining Machinery.**

It is astonishing that so little independent thought is given to the matter of machinery in the majority of mining undertakings. A glance at the careers of the various goldfields shows that there exists a great tendency to erect a certain class of machinery, more because this class is in general use than with due regard to the suitability to existing circumstances.

For instance, a certain mine erects machinery which probably suits their working conditions answers satisfactorily, the surrounding properties, ignoring the fact that their working conditions differ, proceed to install machinery as nearly similar as possible. The result after a time is that independent thought ceases to exist and unproved theories are accepted which finally result in a rude awakening.

Although not exactly in the engineering branch of mining the experience of the Cyanide Process in Western Australia would serve as a good illustration of this tendency. When adopted in South Africa the Cyanide Process proved very satisfactory, the constitution of the ore favoring that particular treatment. Soon after its adoption West Australia noting its success, but quite ignoring the fact that their ores were different in constitution, installed many of these plants with the resulting failure and loss of money.

We are now accepting the fact that light stamps of about 100 lbs. weight are the proper means by which to crush our own ores, while a satisfactory crushing is represented by two tons per stamp per stamp per day. South African mining engineers on the other hand, alive to the importance of output, refused to accept this amount as satisfactory and began to consider ways and means of improving it. The result of some experimental

has surface indications of from twenty-five to thirty-five feet in width, while at the bottom of the main shaft it measures over forty-one feet of solid ore.

Buting the sinking of the shaft a very systematic method of sampling was carried on, and from month to month the general average value of the ore never fell below \$17 per ton free-milling.

There is now on the level 1 dump over 2,000 tons of this ore ready to be milled. While thousands of tons can be stoped out during the further development of the mine. Owing to the very large body of ore this may be accomplished as rapidly as desired, even sufficient to supply a fifty-stamp mill.

There is on the ground a modern ten-stamp mill of the latest pattern all complete, with ample power for twenty stamps which will be erected at once, and will likely be increased to twenty stamps.

**The Triggs Mine.**

Work on the Triggs mine is being prosecuted with vigor by the management. They are sinking in the main shaft and sinking at four levels with good results. They are doing the work at the rate of over five feet each day. The main shaft is down over 221 feet. The assay results and tests from the Triggs are always good from its inception of work, and we are pleased to learn that as work progresses in sinking and drifting, and larger bodies of ore are in sight, that the mine is keeping up its record and frequently exceeding it.

**Quebec Mining Co.**

W. H. Atkinson last week with a crew of men to thoroughly test the different prospects of the Quebec Mining Co. in the Grib lake district. This company is said to have a number of first-class properties and it is their intention to thoroughly prove them before commencing actual development work.

**A Correction.**

We have been taken to task by the management of the Little Bob's mine for an error which inadvertently got into our figures when giving their assay and amalgamation tests, the result of which were \$8.75 and \$7.75 in actual bullion, or \$33.75 and \$15.75 to the ton.

Had these two tests been added to the mine given, the average of the eleven amalgamation tests would have been over \$178 to the ton. We think these results will compare favorably

**From Gunner Hodgins.**

The following letter from Gunner Hodgins, who joined the second contingent, but on account of illness was detained at Halifax, but sailed with the Strathcona Horse to join his regiment, will prove interesting as descriptive of the journey and the spirit of the men. It is dated 1,500 miles out on March 21:

I will try and give you a running report of our trip so far from the time I wrote you last at Halifax, March 15. After writing my last letter to you I proceeded to the armory, where all were being issued their kits, after which we were given leave of absence until 1:30 Friday afternoon, when all boarded - Infantry and Strathcona Horse, and were addressed by the minister of militia, "Dix" Borden; Lord Seymour, commander of the Imperial forces at Halifax; Gov. Daly, of Nova Scotia, and others. The bands were much in evidence. After inspection by Lord Seymour, Gov. Daly and Col. Steele, the troops were ordered to stand at ease until the addresses were heard. The first speaker was Lord Seymour, who spoke to us as soldiers of the Imperial army, as it was a title acknowledged by the Queen to her brave and loyal Canadian soldiers. He also spoke of the loyalty of Lord Strathcona, in presenting to Her Majesty, as a free gift, the services of so fine a body of men for the protection of the flag and empire. He bade us welcome in the name of the commander-in-chief of the British army, also in the name of Field Marshal Roberts and to the ranks of that army. He congratulated Col. Steele on the selection of his men. He wished them God speed and a prosperous campaign.

Sir M. Daly said he wished to repeat today the high appreciation that not only Canada, but the whole of the British empire feels at the noble conduct of our noble and loyal Canadian boys who had taken up arms to support the cause of their Queen and country in a far distant land. They were exhibiting ardor, enthusiasm, loyalty and patriotism. They had heard of those of their fellow countrymen who had gone before them, the tidings of their conduct in the field, how they had won for themselves from Lord Roberts in South Africa. They looked forward to a successful campaign, and for a safe return of all of them to Canada.

Her. Dr. Borden congratulated Lord Strathcona, Col. Steele and the men that it had been possible to send forth such a magnificent force that was then about to embark. They were both representatives of that noble land and of Canada. He said he did not get the 100 men who were going to take the place of the men in the first contingent who had given their lives blood in the defence of the country. All honor to them.

Col. Steele then expressed his thanks for the kind things that had been said of his men and himself, and called for three cheers from his men for their Queen. The order "forward, march," was immediately given, and the troops paraded the principal streets of Halifax, amidst thousands of on-lookers, who cheered heartily. Almost everybody carried a flag. It was a half-

A. E. Boucher has recovered from his recent severe illness.  
The P. Strachan and children left today's morning train for Colorado.

It tipped the scales at 26 pounds.  
Mr. J. Quinn is the proud father of a baby. It's a girl.

The Beatty block is nearing completion and as soon as finished it will be occupied by C. C. Godt's drug list.  
J. Radpath has leased the Princess for the summer. He will use her to pick up logs.

The Presbyterian Ladies Aid Society held a concert and supper at the Presbyterian church Tuesday evening. After a substantial lunch a program was rendered in which the following took part: Norman choir, Norman glee club, m. quartette of Keewatin, C. Suther and Miss M. Scott, Mr. J. Kay and R. Ross. Mr. W. Rose recited a poem of his own composition entitled "The Old Soldier." The piece is given in full in part of this paper.

## THE NEWS FROM KEEWATIN.

One of the worst cases of holding up and taking money from him in the town of Keewatin. Dan B. While returning from Peter B. Wilson's residence, a mile west of Keewatin, on the railway track he was met by two men who turned around directly they were even with him and shot him by the head, knocking him from under him at the same time. He landed him on his face. They proceeded to go through his pockets and found \$10.00, also his watch, which they took. Mr. B. was released and notified a man who was near and they followed the two highwaymen for quite a distance, but lost them on rounding a curve. The provincial police have wired all along the line and it is hoped the two may yet be caught.

Snyder & Ehlén have secured a new grocery clerk. Owing to the large increase of their business they found it necessary to secure more help.

R. A. Mather and John McPherson have left for Eau Claire, Wis., on business in connection with milling machinery.

W. Dougall, who has been working as millwright for the Lake of the Woods Milling Co. for some time, left for his home in Montreal Monday. We hope to see Billy back again before we try to help our boys between the leads in playing hockey.

## Lord Roberts

The Pride of the British  
Empire.

We are pleased to be able to announce to our readers that we are contemplating arrangements with a large publishing firm for a handsome picture of the great general, Lord Roberts, the pride of Tommy Atkins, and of the nation to which he belongs. The picture will be an exact reproduction of the original painting by a famous artist. Every subscriber to THE MINER will have an opportunity to secure a copy of this picture and our readers would do well to wait until they see a sample before securing an inferior picture at greater cost. A further announcement will shortly be made. We might say, as a guarantee that the picture will be all we claim it to be, that the publishers of the picture are the Family Herald and Weekly Star of Montreal, who are noted for the excellence of their pictures.

### TO CURE A COLD IN ONE DAY.

Take Laxative Bromo-Quinine Tablets. All druggists refund the money if it fails to cure. 25c. F. W. Gray's signature on each box.

### The 24th.

The Queen's birthday anniversary was celebrated rather quietly here, few people remaining in town. The fire brigade had a practice in the morning and soon had several streams going near the scene of the recent fire. Prizes were taken up for races for boys under 15. Walter Parsons won the bicycle race and Foreman Power won the foot race.

The day was pleasant, so all that could avail themselves of the opportunity and small picnic parties were the order of the day. All the small water craft available were put into use and everyone was glad to be in such a glorious country for outings.

### Notable Adventures of the First Chief Executive of Delaware:

Immediately upon the seizure of President McKean, Thomas McKean, father of the assembly, became acting-president. George Reed, president of the council and vice-president of Delaware, ought to have succeeded to be president, but at the time of President McKean's capture Vice President Reed was in Congress at Philadelphia. There were so many British soldiers between him and the rest of the assembly, that for a month did not return to Delaware. At the seat of war. At the end of the month he did become president of Delaware.

There were nine successive presidents of the board, but, near the close of the eighteenth century, the title was dropped, and the chief executive began to be called governor. The first to bear the title was Christopher Bedford. He died President M. H. only both he buried the governance of the First Presby-

time than a canoe, with the same  
amount of exertion. It is a real plea-  
sure to ride on it and is just as good  
exercise as the road wheel. We would  
not be surprised if in a short time a  
number of bicycle boats are plying on  
Lake of the Woods.

For light outing suits and the latest  
in straw hats, see Nicholson. His are  
right.

J. K. Brydon will lay the corner  
stone of his fine new block on Sat-  
urday afternoon.

The most complete line of cook  
stoves, from family to hotel size, can  
be seen at J. Hoss's hardware store.

The flags on the public buildings  
were floating this week in honor of  
Mafeking's relief.

Get your fishing lines and trol-  
ling hooks at Jacob Hoss where you can  
get what you want.

Monday next is scheduled for an  
eclipse of the sun. A great portion of  
the sun's surface will be invisible here  
between 8 and 10 a. m.

### You are Talked About

C. P. Howell, of Mine Centre, was  
in town this week.

D. Irwin, of the Soo, was in town  
this week on his way to Rainy River  
to look after his lumber interests.

Rev. F. T. Tapscott, M. A., has re-  
turned from his trip to the east and  
will occupy the pulpit of the Taber-  
nacle on Sunday next.

J. A. Osborne, of the Koochiching  
Herald, was in town this week.

G. A. W. men left for Sawhill on  
Tuesday.

Messrs. Rossman and Edwards, of  
Minneapolis, made a trip to the Eagle

Lake country to inspect some mining  
locations owned by Messrs. Prendible,  
Bruce and Higbee.

W. A. Preston, Jr., and R. W. Pres-  
ton stopped in Rat Portage a day on  
their way to Winnipeg for a visit  
home. They have been at the Olive  
mine all winter.

We were pleased to see J. K. Brydon  
out for a drive Tuesday after his long  
and serious illness. He is conva-  
lescing rapidly and will soon be able  
to attend to his various duties.

G. Campbell, of Fort Frances, is in  
town this week on a business trip.

Geo. E. Island, of Orangeville, stop-  
ped over a few days to visit his  
brother, A. Island, while on his way  
west.

J. A. Partington went down the line  
this week to inspect a new property  
which was reported to be very good.

### Weekly Hospital Report.

R. Thompson, secretary of the Royal  
Jubilee hospital, makes the following  
report for the week ending May  
18, 1900:

Under treatment May 12 10  
Admitted during week 1  
Discharged during week 6  
Deaths during week 0

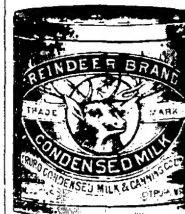

### Singers and Speakers.

Throat irritation is most annoying  
to platform people and to prevent this  
as well as hoarseness and sore throat  
most singers and speakers carry with  
them a bottle of Dr. Chase's Syrup of  
Lime and Turpentine. It promptly  
and positively relieves and cures all  
dryness, soreness or hoarseness in the  
throat, tightness in the chest, bron-  
chitis, asthma and all kinds of coughs  
and colds. 25c a bottle. Family size  
50c a bottle.
